The response rate shown at the top of the report is an overall SETU response rate for the unit offering that is based on the proportion of invited students that completed the survey. The response rate for individual teachers (i.e. the proportion of the students that they taught that answered the teaching questions) may differ - however the 'Surveys completed for the teacher' figure reported at the top of the report enables the calculation of a response rate for the teacher for a specific question.

* The median shown here (interpolated median) is calculated under the assumption that the five point scale represents a continuous random variable rather than five discrete categories.
